

CAMVEX (VIC) PTY LTD

Position Description

Position Title:	Technical Project Coordinator
Reports to:	Sales Manager
Business Unit/Support Unit:	Sales Department, Installation and Service Departments
Current Incumbent:	Vacant
Annual Review Date:	xx/xx/xx

Role Purpose:

An engineer/technician who can perform a combination of internal service tasks (analogue and IP), quality control on commissioning of systems, remote maintenance agreements and process small works for existing clients (includes creating and updating CCTV documentation) as well as installation roll outs for national accounts and coordinate broadband connections for clients.

Provide support to sales department with processing quotations and works for existing and/or prospective clients.

Provide support to product manager with testing of new systems and software remotely.

Generate income by charging clients for Technical Project Coordinator's time with various part numbers in JIWA relating to "remote support", "project management", "documentation fees", "service labour" and "maintenance agreements".

Key Accountabilities

Key Area of Accountability	How is this to be achieved?	How will it be measured?
Perform remote site inspection audits for sales enquiries.	By remotely connecting to systems if possible and by obtaining information (photos and marked up plans) from customers and Camvex technicians and contractors. Obtain site plans when available.	Completed in time frame specified to customer as per agreement with sales manager. Customer feedback.
Provide quotations and system design recommendations relating to sales enquiries.	Apply principles, standards and specifications nominated by sales manager and/or specific client account manager. Understand the range, capabilities and limitations of CCTV equipment and software. What equipment best suits an application and the difference between various models.	Income generated. System design outcomes. Turnaround time. Customer feedback.
Create and update CCTV documentation.	Apply principles, standards and specifications nominated by sales manager and/or specific client account manager. Understand and master the creation and updating of CCTV plans, equipment schedules, schematics and installation instructions to Camvex standards.	Income generated. Turnaround time. Installation/Service Dept feedback. Customer feedback.
Processing of customer works orders.	Inputting of works orders into Camvex systems such as Jiwa for ordering of stock and processing of installation and service works as per principles, standards and specifications nominated by sales manager	Turnaround time. Installation/Service Dept feedback. Customer feedback.

Project management of customer works orders and roll outs.	Apply principles, standards and specifications nominated by sales manager and/or specific client account manager. Provide project management reports to sales manager and/or specific client account manager as required and directly to clients when nominated.	Turnaround time. Quality of reports. Customer feedback.
Remote commissioning of systems to improve quality control of our installations and improve standards relating to delivery of service.	Connect to systems remotely to either assist field technicians with system commissioning and/or completely commission systems as per installation documentation provided by sales department.	Installation completed in time frame specified to customer as per installation documentation. Customer feedback.
Support of remote maintenance agreements	Perform remote maintenance works as per agreements with clients.	Income generated. Customer feedback.
Technical support to service department.	Assist service department with any technical support they may require including qualifying system faults, phone support, logging jobs, tasking remedies etc.	Income generated. Technical issues resolved. Customer feedback.
Feedback to Product Manager regarding new products, systems and software.	Relay relevant information to Product Manager when remotely commissioning systems and/or supporting them.	Product Manager feedback.
